With Solutions That Make A Difference

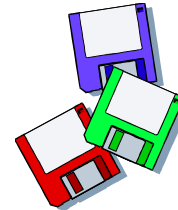

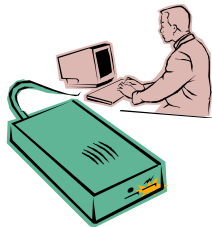

Remote Data Back-up Solutions

fileprotect.net

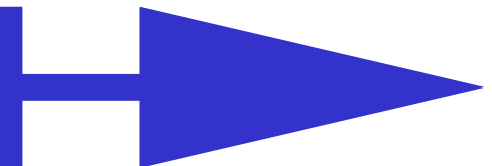

Today more so than ever it is becoming more critical to protect data on your computer.

Using traditional back-up facilities can be messy, cumbersome and time consuming.

Somebody has to sit in front of the computer everyday and make it happen – which is costly.

Remote Data Back-up Solutions

fileprotect.net

File Protect's Remote Data Back-Up service is the most cost effective, secure and convenient way to automatically back-up your mission critical data files *offsite every night if you wish*.

Your data is your most valuable asset and it needs to be properly protected by a reputable online back-up service.

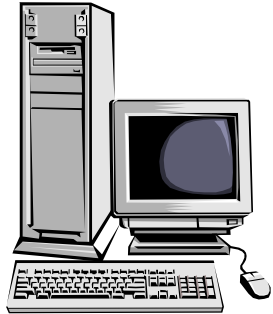

...And you can protect it from less than the cost of a daily newspaper.

GIVING YOU PEACE OF MIND

Remote Data Back-up Solutions

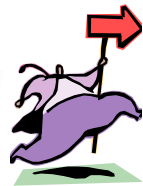

How does it all work?

Our Remote Data Back-Up software automatically selects, compresses and encrypts your data for transmission to our main Data Storage Area at a pre-selected time schedule and automatically downloads the selected data. It is then backed-up a further 3 times at different locations for added protection.

Main Data Storage
Area Back-Up

2nd Data Storage
Area Back-Up

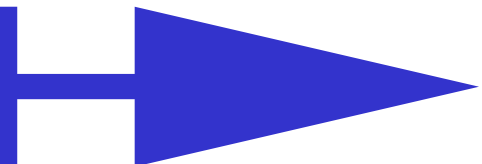

3rd Data Storage
Area Back-Up

4th Data Storage
Area Back-Up

Your data is backed up 4 times - all automatically

Remote Data Back-Up Solutions

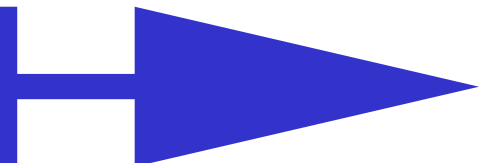

fileprotect.net

- You choose which files to back-up
- You choose daily, weekly, monthly or other back-up times to suit your needs
- It all happens automatically
- All files encrypted
- Files restored when needed

Remote Data Back-up Solutions

fileprotect.net

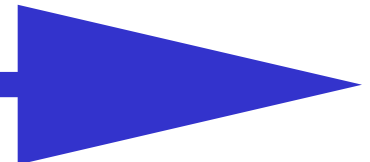

After successful back-up an email is sent to your computer confirming back-up is complete.

You never have to think about backing up each night again.
And all from less than the cost of a daily newspaper.

And best of all... [You can try it for FREE for 14 Days](#)
